AUDIT SUMMARY - INNOVATION

AUDIT OBJECTIVES:

Checkboxes are aligned with the "Actual Result" computations we discussed.

JAYRO – Backend QA Checklist = 4PTS

Goal: Leave Workflow + API (Phase 1)

Scoring: 1 point per unit test / API scenario → Total = 100 points

☐ Submit → TL → HR flow works (no pt./ Process name)

☒ Validation rules (overlap, balance, date) correct

☒ Sick leave triggers med cert requirement (>2 days)

☒ Audit logs complete

☒ Notifications (submission, approval, rejection) sent

☒ Calendar overlay reflects approval

☒ Role-based access works

☒ Reporting endpoint outputs weekly stats

☒ Unit tests pass (>90% success) (no pt.)

☒ Integration tests successful (no pt.)

CONCERN:

Sir Jayro is requesting that points also be allocated for both front-end and back-end tasks, as he currently has no counterpart handling these areas. At present, he is solely responsible for validation, upload, and API-related work (backend).

LESTER: 0

Since Mr. Lester failed to submit his Weekly Goal Report as required, his score for the period is automatically recorded as **zero (0)** in accordance with the established KPI and reporting guidelines.

The Recognition Wall, which served as Mr. Lester's main task for the week, was compromised and rendered non-functional due to a human error during system handling.

It was also noted that, despite the instruction given last week, he failed to add IT Mark to the list of personnel authorized to approve announcements.

NANI – Infra / Media QA Checklist = 3PTS

Goal: NSSM Integration + Video Course

Upload/Streaming

Scoring: 1 point per sub-check → Total = 100 points

☒ NSSM service starts automatically

☒ Logs stable (no crash within 60 mins) – add but can't play

☒ Video upload works with file validation

☒ Signed URLs generated with expiry

☒ Playback secure and restricted

☒ Access control enforced

☒ Streaming stable on 4G

☒ IP restriction tested

☒ Monitoring logs available

☒ Performance acceptable

CONCERN:

Sir Hernani was only able to finish three tasks because he had to fix several system bugs. After the power interruption, new issues appeared in the system and needed urgent troubleshooting.

MONDAY: Interview & Manual Logins

TUESDAY: NSSM & backend (troubleshooting)

WED & THUR: improve backend & indices

FRIDAY: Video Upload

• EOD REPORT:

The importance of the EOD Tracker was reiterated to the team, emphasizing that it serves as a mandatory daily accountability and monitoring tool. A final warning was issued to Sir Lester, Sir Jayro, and Sir Nani, reminding them that the EOD submission is required **every day without exception**. Failure to comply moving forward will result in the implementation of **progressive disciplinary action**, in accordance with company policy.

- Ma'am Almira and Sir Houston will begin submitting their Weekly Goals every Monday, in compliance with the reporting schedule.
- We were unable to fully evaluate their weekly performance because no Weekly Goals were submitted, which limited the accuracy of the assessment. However, it is noted that they have accomplished significant tasks during their first week. They were advised to continue working through their challenges and ensure proper goal-setting moving forward.
